Hello ENCOD

Now I am already the sixth month in the execution of sentence and I does not become tired to believe in our good plants.

I am especially Happy to hear that European activists with a lot of fantasy starts to actions: This contains a lot of energies and happiness for me.

The first Viennese meetings of the ENCOD against the „War on Drug“, is an important sign. Directly at the door by the ban maker. In my cell the news about that meeting reached me over the television.

Even if this time I could not be with you, I am pleased me onto a meeting again.

The time here precedes well. In English I read already six books and I also worked on the language-course. It's only with the computer science I precedes slowly unfortunately because the whole PC's were pulled in for control, I got back only still the half material but I can negotiate about with the director. Maine beginner exercises on the drums did not always fall to all here, but I believe, slowly it hears already according to music. You don't have angered, it goes still some times until you must hear a sample of that. At this time I queue particularly onto an one cell then can I more undisturbed learn and find the rest to meditate.

Juridical witch-hunt in Freiburg.

My bank accounts already spaced before years. Then I was arrested on suspicion, later in this way that was been impossible to me come able to pay my obligations. My hemp field was destroyed on day of the legal harvest, under the pretext that I could manufacture illegal products from that field although the control of the police was promised and I was still in investigation custody. In this way should be prevented secure that I could pay nevertheless with legal products still my bills. A few months later a charge comes of the same examining magistrate because of embezzlement of the social security money (AHV- AVS) I until today not has paid. Logical I was also hindered to pay my bills. The investigations against me ran expanded one corresponding that. At last a concrete charge.

Already with my last judgment, the court had practiced only, due to the turnover by me, and the fact that I written prevention info, judges only this facts as being fulfilled of an offence against the Drug-law. All courts refused to decide about the THC level or analyse.

That the Entire courts in my canton had to step into the strike, because of illegal agreements in a similar fall, underlines the arbitrariness of the punishment. This did not hinder also the highest courts to reject all evidence requests for my part at that. It is supposed to be obtained Right-bend and not human rights.

There is war against drugs in our country.

Every year people are robbed of hers freedom in Switzerland, arrested. Particularly the young ones, from the police undressed and naked everywhere is had a look, 50'000 are condemned this year by the Curt (Double as many as in the year 2000). Socially degraded, marks with the Jew star of drug users, to many goes into the Prison, treated lockedly as cattle.

A behaviour as in a police state. Today suffices to enjoy plants, put onto the edge of the society, to be condemned, detained, judged, to be banished around.

We are still not wider than is the witch delusion.

The bill, dear taxpayer is repeatedly bitter, however, for you. Only the prosecution cost in the year 2000, 500 million. sFr.! Money that stands not available to the public social aids. The execution of sentence surely still costs once twice so much and supports the criminal training. The Caught Fathers and husbands can not pay anymore for hers families, the society impoverished the social security offices paid. The war against drugs created this lucrative market to the underworld, billions taxes free, for the economics of the criminality with annual growth rates of those ones legal businesses only dreams. The prohibition is useful to the traders, forms the basis for the black market and facilitates a shameless exploitation of consuming. Through that swing the morality club, the streets are made unsure and spear is spreading under the citizen reacts. The vision of a society without Illegal Drugs a Totalitarian Regime can not obtain and when, then only through the control of the market as at the alcohol.

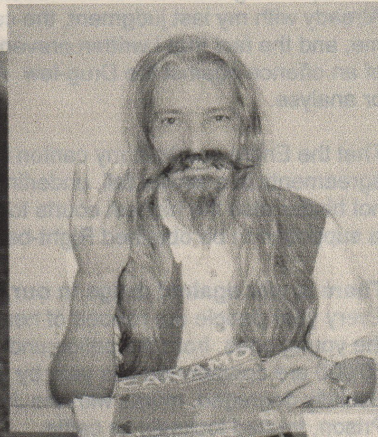

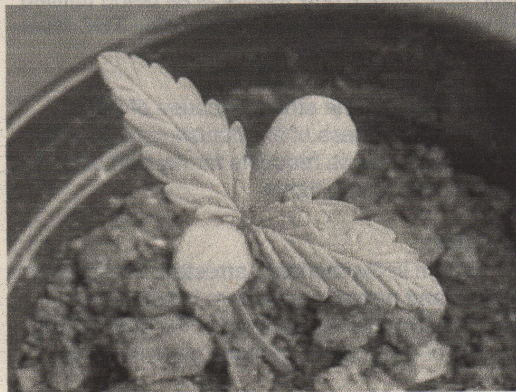

In the parliament our citizen initiative (Cannabis, production and trade) was recommended to the nation for the refusal of the councils now. It results now therefore in a plebiscite.

From the Swiss parliament also gives a good information, the law for the Medical use of Drugs was accepted in March at last.

A referendum of right parties (SVP and EDU) was already announced.

All my love to you.

André
